FREEDOM OF INFORMATION ACT – PUBLICATION SCHEME

1. Introduction

1.1 The model on which this publication scheme is based has been prepared and approved by the Information Commissioner. The Trust has adopted it without modification. This publication scheme commits the Trust to make information available to the public as part of its normal business activities. The scheme commits the trust and each of its academies:

- to publish proactively, or otherwise make available as a matter of routine, information, including environmental information, which is held by an academy in the Trust and falls within the classifications below
- to specify the information which is held by the Trust and falls within the classifications below
- to publish proactively, or otherwise make available as a matter of routine, information in line with the statements contained within this scheme
- to produce and publish the methods by which the specific information is made routinely available so that it can be easily identified and accessed by members of the public
- to review and update, on a regular basis, the information the authority makes available under this scheme
- to produce and make available a schedule of any fees charged for access to information
- to make this publication scheme available to the public
- to publish any dataset held by an academy that has been requested, and any updated versions it holds, unless the academy is satisfied that it is not appropriate to do so; to publish the dataset, where reasonably practicable, in an electronic form that is capable of re-use; and, if any information in the dataset is a relevant copyright work and the public authority is the only owner, to make the information available for re-use under a specified licence. The term „dataset“ is defined in section 11(5) of the Freedom of Information Act. The terms „relevant copyright work“ and „specified licence“ are defined in section 19(8) of that Act.
